- Urban Design

Fluent in English, French & Spanish

PROFESSIONAL HISTORY

Julien joined the Ekistics team in August 2024 as a Planning Consultant.

Between 2022 and 2024 Julien has been involved with the Planning Institute of Australia as Co-Convenor for the South Australian Young Planners Committee as well as member on the South Australian Division Committee.

Julien has worked as a Development Technician and later Development Officer for the City of West Torrens from August 2022 and August 2024. This involved assessing development applications, managing public notification processes, assisting with Council Assessment Panel meetings and advising members of the general public as well as professionals of the industry on the Planning and Design Code and various Council procedures.

EXPERIENCE

Thanks to his recent time in local government, Julien has acquired a sound knowledge of the planning system, the PDI Act and Regs, as well as the Development Application Processing (DAP) portal. Julien is also keenly aware of the standard procedures and timeframes applied by Council at all stages of development approval (from preliminary advice to decision).

Julien is currently studying a Master of Urban Design and has a strong interest in the physical appearance of our built environment, creating functional, people focused places and a high-quality public realm.
