Awarded University Merit Award (2025)

Bachelor of Science (Chemical Sciences) – Flinders University

## Affiliations

Graduate member of the Planning Institute of Australia (PIA)

## TIMOTHY HUTTON PLANNING CONSULTANT

### EXPERTISE

- Statutory Planning
- Development Assessment
- Research

### PROFESSIONAL HISTORY

Joining Ekistics in 2024, Tim commenced as an Assistant Planning Consultant while completing his Master of Urban and Regional Planning. During this period, he supported the delivery of statutory planning work across a range of project types and developed a strong grounding in the South Australian planning system.

Tim graduated in 2025 and was awarded a University Merit Award in recognition of academic performance.

Since completing his studies, he has continued to build experience within multidisciplinary project teams, contributing to planning documentation, client advice, and approval processes for public and private sector projects.

### EXPERIENCE

Since joining Ekistics, Tim has contributed to a range of statutory and strategic planning projects across South Australia. His experience includes supporting Code amendments, undertaking development assessments, assisting with community engagement processes, and completing research tasks to inform planning advice and approval pathways.

Tim is motivated by the role that quality urban planning plays in shaping healthy, liveable and inclusive communities. He values planning outcomes that support social wellbeing, environmental responsibility and long-term community resilience, and approaches his work with an understanding of both policy intent and practical implementation.

Through his postgraduate thesis, Tim examined how South Australia's planning system represents the rights, interests and cultural heritage of First Nations communities. As part of this research, he undertook detailed examination of planning legislation and strategic policy, contributing to a broad understanding of the structure and operation of the South Australian planning system.
